

AJAY S

Full Stack Developer | Software Engineer | MERN Stack Developer

+91-9344170591 | ajaysettu1@gmail.com | linkedin.com/in/ajay-s-4b3383267 | github.com/Ajay-2k3 | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Full Stack Developer (MCA, Expected May 2026) with production experience building scalable web and mobile applications using React.js, Next.js, Node.js, TypeScript, and PostgreSQL. Delivered 12+ RESTful API endpoints with ~35% response-time improvement during an internship at Bluewhiz Infotech, and built a cross-platform IoT mobile app managing 500+ nodes. Developed an advanced AI Stock Prediction Platform featuring LSTM/Transformer ML models, Redis caching, and real-time WebSocket data streaming. 180+ DSA problems solved on LeetCode and HackerRank. Seeking a Software Engineer or Full Stack Developer role to contribute to high-impact product teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend: React.js, Next.js, React Native, Tailwind CSS, Bootstrap, Framer Motion, Shadcn UI, Redux, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, Spring Boot, RESTful API Design, Microservices, Apache Kafka, JWT, RBAC, Middleware Development

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Redis, Prisma ORM, Database Schema Design, Query Optimization, Indexing

DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD Pipelines, Docker, Postman, Linux, Vite

Cloud & Services: AWS (EC2, S3), Azure, Vercel, Supabase, Socket.IO, Razorpay, Google Maps API

Methodologies: Agile/Scrum, Test-Driven Development (TDD), OOP, Design Patterns, SDLC, Code Review, Data Structures & Algorithms

EDUCATION

Master of Computer Applications (MCA) | Jun 2024 – May 2026

SRM Easwari Engineering College, Chennai | CGPA: 9.0 / 10

Bachelor of Computer Applications (BCA) | 2021 – 2024

| Adhiparasakthi College of Arts and Science, Ranipet | CGPA: 6.9 / 10

WORK EXPERIENCE

Backend Developer Intern | **Bluewhiz Infotech Pvt. Ltd.** | Apr 2025 – Aug 2025

React Native · PostgreSQL · Supabase · Node.js · REST APIs · JWT · RBAC · Tailwind CSS · Git · Agile/Scrum | Dindigul, India

- Designed and developed 12+ RESTful API endpoints with JWT authentication, input validation, and error-handling middleware, reducing average API response time by ~35% (from ~750 ms to ~490 ms).
- Architected and deployed a cross-platform React Native mobile application managing real-time IoT telemetry for 500+ street-light nodes across 5 municipal zones with RBAC and multi-role JWT authentication.
- Optimized PostgreSQL and Supabase database schemas using compound indexing and real-time subscriptions, reducing query latency by ~40% under concurrent user load.
- Conducted code reviews on 6 pull requests, enforcing RESTful API standards and clean code principles; identified and resolved 8 production defects through systematic log analysis.
- Collaborated across 3 Agile sprint cycles to gather, document, and implement functional requirements following SDLC and component-based architecture best practices.

PROJECTS

AI Stock Prediction & Monitoring System | Mar 2026

React.js · Node.js · TypeScript · Python FastAPI · PostgreSQL · Redis · Socket.IO · LSTM · Transformer · XGBoost

- Architected a full-stack Indian stock market platform (NSE/BSE) with real-time WebSocket data streaming, live charts, watchlists, portfolio analytics, and an AI assistant with voice-enabled responses, achieving sub-500 ms prediction latency on a 500,000-row dataset.

- Built a Node.js/TypeScript backend with Express.js, JWT authentication, bcrypt, Helmet, rate limiting, and CSRF protection; configured background jobs for stock/news fetching, prediction generation, and WhatsApp alert delivery.
- Integrated a Python FastAPI ML microservice using an ensemble of LSTM, Transformer, Random Forest, XGBoost, and Reinforcement Learning models for stock price and trend prediction with RAG-style AI context retrieval.
- Designed a normalized PostgreSQL schema with Redis caching and optimized aggregation queries; structured ML inference, data access, and API layers for independent testability and horizontal scalability.

Flowerly — Multi-Tenant Floral E-Commerce Platform

Next.js 16 · React 19 · Tailwind CSS v4 · Prisma · Supabase · PostgreSQL · Socket.IO · Razorpay · Bull MQ · NextAuth

- Architected a 4-tier multi-tenant e-commerce ecosystem with 35+ responsive pages across Customer App, Seller Dashboard, Delivery Agent App, and Admin Analytics Portal using Next.js 16 App Router and React 19.
- Built a component-based frontend with Tailwind CSS v4 and Shadcn UI featuring glassmorphism design, Framer Motion animations, and Recharts data visualizations for seamless cross-device UX.
- Engineered a 3-step checkout flow (Address → Time Slot → Payment) with Razorpay integration, custom subscription plans (Daily/Weekly/Monthly), and real-time delivery tracking via Socket.IO and Google Maps API.
- Designed relational schemas with Prisma ORM and Supabase (PostgreSQL), implemented NextAuth role-based authentication, and configured Redis/Bull MQ background job queues for scalable async order processing.

CERTIFICATIONS & ACHIEVEMENTS

JPMorgan Chase Software Engineering Virtual Experience Program | Forage | Apr 2026

- Built a Java-based Apache Kafka consumer microservice for high-volume financial data streams; integrated JPA entity persistence with REST API using Controller/Service/Repository layering; validated with 15+ JUnit unit tests achieving 100% pass rate.
- Technologies: Java, Spring Boot, JPA, Apache Kafka, JUnit

Diploma in Java Programming — Grade A | Nov 2023

180+ DSA Problems Solved | LeetCode

Topics: Dynamic Programming, Graph/Tree Algorithms, Sliding Window, Binary Search — MNC screening difficulty
